**Summary of Legislation**

Under current law, the Department of Public Safety (DPS) is required to promulgate rules regarding standards for consent for the collection, testing, and release of test results of forensic medical evidence in sexual assault cases. The DPS was also to develop consent forms that notify persons of the potential effects of and require acknowledgment of consent for each step of the process. This bill clarifies that the consent information is to be included in the form.

**State Expenditures**

The existing consent form already complies with the requirements of HB14-1171. This bill eliminates the need to do additional rule-making in order to make adjustments to the consent form. As such, it reduces costs for the DPS by a minimal amount if the department determines it needs to adjust the form in the future.

**Effective Date**

The bill was signed into law by the Governor and took effect on March 27, 2014.
